Tailwind
Javascript
React
Express
Node

Personal Projects

Lifetracker

 A web application that allows users to keep track of various events happening in their life. This app's backend was built using JAWSDB and is accessed using JQuery and Javascript, The frontend used tailwind to style various aspects, as well as animate others.

Employee Tracker

A CLI application using Node.js, Inquirer and MySQL in order to interact with the user's database. After starting the program, the user responds to prompts to add, edit, and delete objects within the database.
